EDUCATION

ADNOC Schools   **Abu Dhabi, AZ, United Arab Emirates**
High School Diploma - Honor Roll

Toronto Metropolitan University   `   **Toronto, ON**
Bachelor of Science (Honors) – Computer Science

OBJECTIVE

As a Bachelor of Science in Computer Science and aspiring junior front-end developer, I am excited to contribute my skills and strong foundation in programming into innovative projects for your company. Offering engaging and responsive web solutions and committing to keeping my knowledge of the latest web development practices up-to-date. With a passion for personal growth and my nature of curiosity, I thrive in collaborative environments which help me learn quickly and adapt to new technologies, further contributing to the success of a dynamic development team.

PROJECT EXPERIENCE

VinGO   **Toronto. ON**
Personal Project   *Mar 2024*
- Developed a responsive website for a digital record store with a focus on integrating Spotify's API for data communication.
- Utilized React and Bootstrap to create and style an interactive front-end interface, making it easier for users to interact and navigate through the website.
- Implemented a search bar to browse music albums by integrating the Spotify API which is the core functionality of the website.
- Published the website via GitHub by pushing the project onto GitHub pages: https://ferhananwar.github.io/vingo/
- *Technologies Used:* HTML, Bootstrap CSS, React JS, GitHub

WORK EXPERIENCE

IEEE Ryerson Computational Intelligence Chapter   **Toronto, ON**
Director of Marketing   *May 2020 - Dec 2021*
- Conceptualized and executed a rebranding initiative starting by designing the logo using Adobe Illustrator, resulting in raising brand recognition among industry professionals at IEEE.
- Collaborated with the VP of Marketing to develop and execute a social media content calendar, resulting in an increase in engagement and a growth in followers over a two-month period.
- Created visually appealing graphics for Instagram posts, including workshop reminders, event summaries, and recruitment outreach efforts, leading to an increase in workshop attendance and member sign-ups.
- *Technologies Used*: Adobe Photoshop and Illustrator
